

Blackjack Gigantamo Bloom Feeding Tables

Example in gray: If your plants are growing in 4-gallon pots and you wish to use one tablespoon of Blackjack Gigantamo Bloom plant food for each gallon of soil in the pot, you will be able to feed 6 potted plants with a ½ pound package.

* Blackjack has listed 2 tablespoons of Blackjack Gigantamo Bloom per gallon of soil for growers who are sure that these amounts will not overfeed their plants. In other words, they have done prior tests using a few plants as test subjects and have observed no negative effects from using more than 1.5 tablespoons per gallon of soil.
